Hypocalcemia may worsen during treatment. Patients must be adequately supplemented with calcium and vitamin D.
Renal Impairment: Monitor creatinine clearance before each dose.
Osteonecrosis of the Jaw (ONJ) has been reported. All patients should have a routine oral exam by the prescriber prior to treatment. Atypical Femur Fractures have been reported. Patients with thigh or groin pain should be evaluated to rule out a femoral fracture. Severe Bone, Joint, and Muscle Pain may occur. Withhold future doses of Reclast if severe symptoms occur.
